

Faculty, Staff & Student Guide for Connecting to Campus Wireless

1. Select **UNA Start Here** in your list of available wireless networks.
2. When your device shows it is connected to “UNA Start Here,” open a web browser.
3. At the welcome page, select **Employee/Student**.

Welcome to the UNA Wireless Network

To set up network and Internet access, please choose your user type and login.

Employee/Student

Employees/Students with valid credentials will be moved to a secure wireless network and will receive full network access. In order to properly and securely access all necessary resources, all employees and students needing wireless access should utilize this network.

New Guest

Guests will receive restricted Internet-only network access as some on campus resources will not be available from the guest wireless network. Also, the guest network's speeds are limited in order to accommodate the main campus network and the broadest number of possible users.

Returning Guest

Login to your existing guest account or request your password to be resent.

4. **Select your device/operating system** from the drop-down list if it isn't automatically detected.

The image shows a web page for configuring a WiFi connection. At the top is the University of North Alabama logo, featuring a yellow lion silhouette inside a shield. The text "University of" is in a script font, and "NORTH ALABAMA" is in a bold, sans-serif font. Below the logo is a welcome message: "Welcome to the configuration and connection technology for UNA WiFi. Click to get started." Underneath, it says "The following system was detected:" followed by a list of network parameters: SSID/NetworkName: UNA WiFi, SecurityType: WPA2-Enterprise, Encryption: AES, EAP Type: PEAP, Inner EAP Type: MSCHAPV2, and CA Certificate: main-PINE-CA (Sun Mar 11 04:31:06 UTC 2035). At the bottom, there is a question "Was your device detected incorrectly?" and a dropdown menu labeled "Select your device: Unknown". A red arrow points to this dropdown menu. At the very bottom right, it says "Powered by SecureW2".

Welcome to the configuration and connection technology for UNA WiFi. Click to get started.

The following system was detected:

SSID/NetworkName: UNA WiFi
SecurityType: WPA2-Enterprise
Encryption: AES
EAP Type: PEAP
Inner EAP Type: MSCHAPV2
CA Certificate: main-PINE-CA (Sun Mar 11 04:31:06 UTC 2035)

Was your device detected incorrectly?

Select your device: ▼

Powered by SecureW2

5. Select **Join Now**.

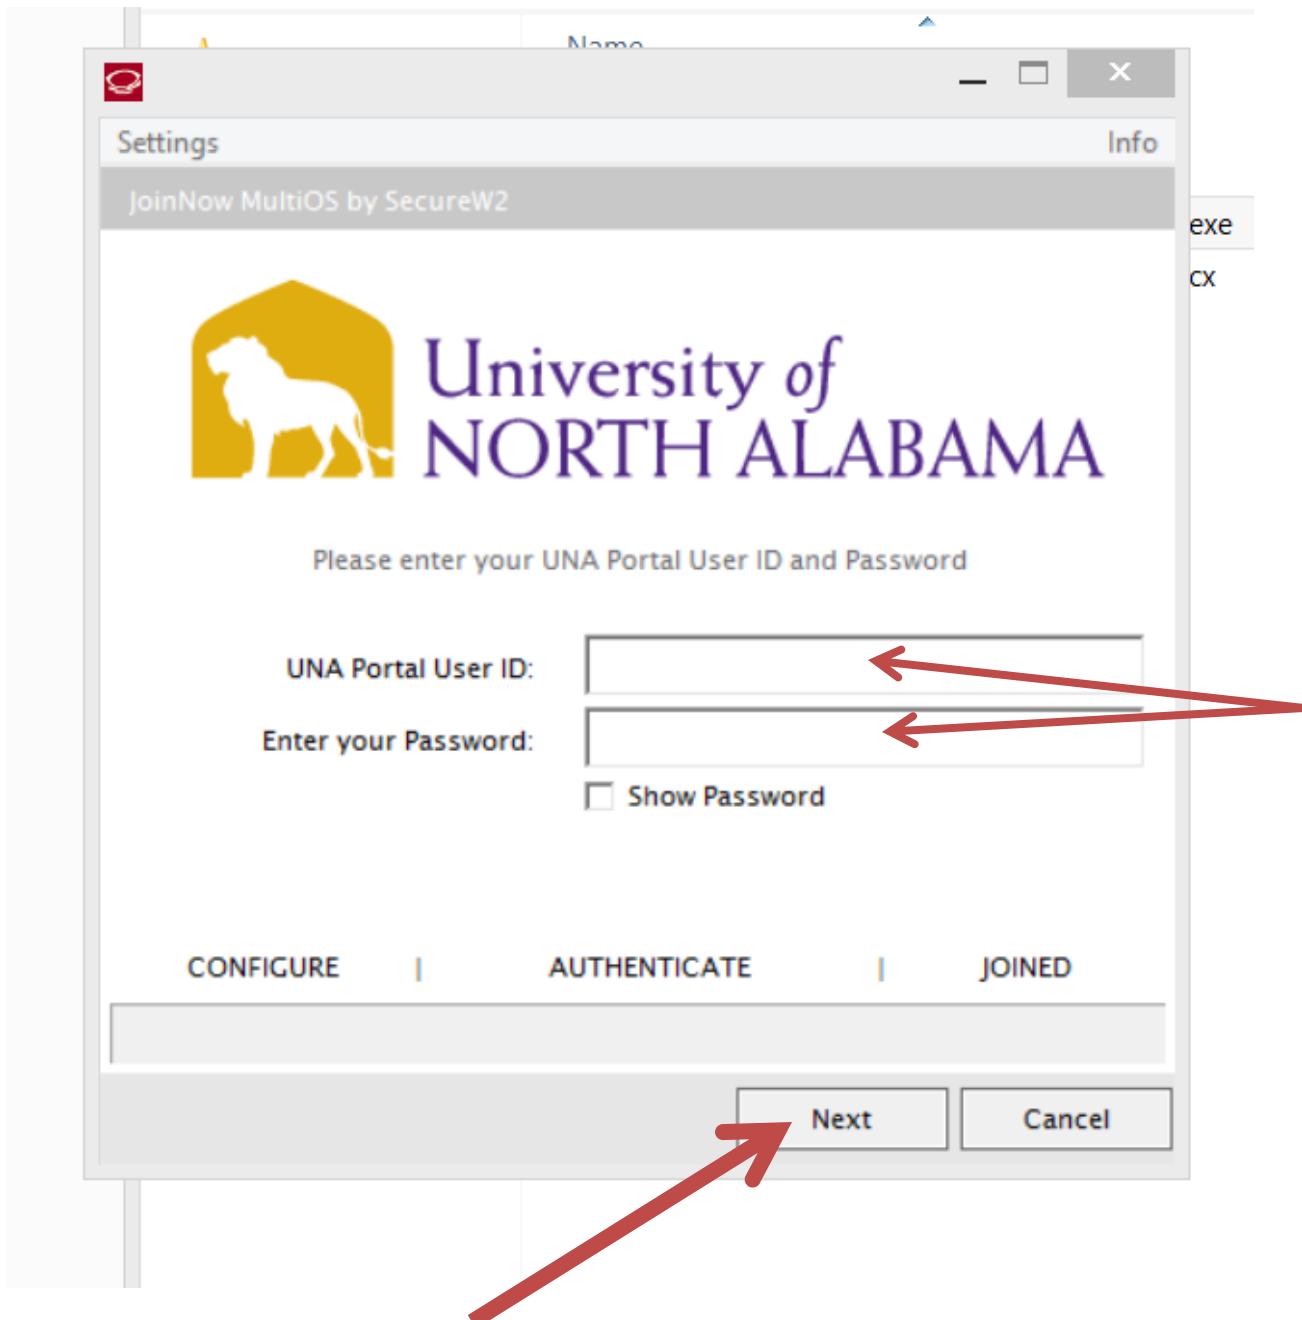

6. Depending on your web browser, click **Save/Run** when prompted.

a. If you selected Save, locate and run the file

WiFi_University_of_North_Alabama_wrapper.exe.

b. If prompted by a Windows Security message, select Install/Run Anyway.

7. Enter your **UNAPortal Username and Password**.

8. Select **Next**.

9. After you receive the “**Joined...**” message, Select **Done**.

10. At this point you should be connected and able to surf. Depending on which web browser you are using, you may have to close and restart your browser.
